PROFESSIONAL EXPERIENCE

Remote Fullstack Developer at MageBinary

Aug 2024 - Oct 2025

ACCESSABLE (E-commerce platform for medical equipments)

- Description : A large-scale e-commerce web platform enabling hospital healthcare workers to rent and buy medical equipments for their patients.
- Role : Frontend Developer/Team Lead Support.
- Tech Stack : NextJS, Tailwind, NodeJS, Odoo, Docker.
- Responsibilities :
 - Designed and implemented responsive user interfaces for submitting rental forms and tracking order status. Ensure the UI easy to understand for non-tech users.
 - Optimized data from Odoo.sh, created fast GraphQL query/mutation to interact a load of data with many records created a day.
- Impact : Deployed and used in over 20 hospitals in many areas in New Zealand, receive good feedbacks from users.

Remote Frontend Developer at Smisy

Dec 2024 - Jul 2025

NAILS CLOUD - BEAUTY LOVERS APP (Salon systems management - POS and Customer App)

- Description : A complete ecosystem for US salons, enabling efficient management of appointments, technicians, income, schedules,... including: POS app, Customer app, Windows App and Online booking website).
- Role : Frontend Developer/Mobile Developer.
- Tech Stack : ReactJS, React Native, Tailwind, Azure DevOps, Github Actions.
- Responsibilities :
 - Build and implement a shared Storybook component package to ensure consistency and accelerated development across the POS App, Customer App, and Online Booking website.
 - Developed high-quality, smooth, and visually appealing user interfaces for both web and mobile.
- Impact : Sucessfully deployed and used by over 10 salons in US, handle large datasets everyday and all the systems (apps and website) still working consistently.

MOTCUAPORTAL - DICHVUCONG (Administrative Web Platform - Microservices)

- Description : A large-scale administrative web platform enabling government service centers across Southern Vietnam to manage and process public and business-related administrative records.
- Role : Fullstack Developer.
- Tech Stack : Angular, Spring Boot, Kafka, Elasticsearch, MongoDB, Docker, Jenkins.
- Responsibilities :
 - Designed and implemented responsive user interfaces for submitting administrative forms and tracking document processing status.
 - Engineered and optimized APIs to support complex business logic, with integrated Elasticsearch for fast data querying.
- Impact : Successfully deployed across all provinces in Southern Vietnam, handled massive daily data volumes (500,000 rec/day), ensuring performance and reliability at scale.

11x Emergency App (IOS/Android App)**Jan 2023 - April 2024**

- Description : An internal hospital emergency mobile app for the 115 Emergency Center. Key features included live patient transport tracking, emergency case creation, and direct hospital integration for patient admission.
- Role : Mobile Developer.
- Tech Stack : Flutter, Firebase, WebSocket
- Responsibilities :
 - Developed business logic features for mobile applications using Flutter.
 - Integrated with backend APIs to manage and present real-time data.
 - Implemented push notifications using Firebase and live location features with Google Maps.
- Impact : Successfully deployed for the 115 Emergency Center internal use, enhancing coordination efficiency.
