ABOUT ME

I'm a **Fullstack Developer** with **3 years** of experience building scalable web/mobile applications and production-ready systems. Proven track record of delivering production-ready APIs and robust admin dashboards for high-traffic commercial applications across **Japan, Singapore, and Vietnam**. Proficient in Laravel modern frontend technologies, with specialized expertise in payment gateway integration and the implementation of AI-powered services to drive business innovation.

EDUCATION

2020 - 2023 FPT COLLEGE HO CHI MINH | SOFTWARE ENGINEERING

SKILLS

- **Languages:** PHP, JavaScript, TypeScript.
- **Frameworks:** Laravel, WordPress, NestJS, Next.js.
- **Databases:** MySQL, PostgreSQL, MongoDB.
- **API Development:** RESTful, GraphQL, StripeAPI, OpenAI, Gemini API.
- **Automation:** N8N workflow, Playwright.
- **CI/CD:** Nginx, Docker, Github Action.
- **Unit Test:** Jest.

WORK EXPERIENCE

Apr 2025 -
Jun 2026

ZenS Company | Fullstack Developer

Project: **UT Web Market**

Description:

- An e-commerce and community platform. Developed a new web application from scratch based on the existing mobile app's workflow, alongside backend maintenance and the integration of a new customer loyalty/points system.

Role: Fullstack Developer

Tech Stack: **Next.js, TypeScript, Tailwind, Zustand, Next-Auth, Square Payments, NestJS, Redis, PostgreSQL.**

Key Responsibilities:

- **Web App Engineering:** Built a responsive frontend using Next.js & React, to mirror the mobile app's shopping and community features.
- **Loyalty System:** Maintained the NestJS backend and engineered a point accumulation feature to track user purchases and manage reward balances.
- **Payment Integration:** Integrated **Square Web Payments SDK** for a secure, tokenized multi-step checkout and registration flow.

Aug 2025 -
Nov 2025

ZenS Company | Backend Developer

Project: Fire Safety E-commerce & CRM Integration (Gasfe)

Description:

- A specialized e-commerce platform for fire safety equipment (PCCC), integrated with a CRM system to streamline sales workflows and automate customer data management.

Role: Backend Developer (Laravel, PHP, Filament)

Tech stack: Laravel, PHP, Filament, OpenAI GPT API, RESTful API, JWT, MySQL.

Key Responsibilities:

- E-commerce & Admin Panel: Developed core product catalogs, dynamic blogs, and a comprehensive **Filament-based** dashboard to manage content, system configurations, and sync logs.
- CRM Sync & Process Digitization: Engineered a **2-way API sync** to automate Leads/Deals creation from orders, and digitized manual workflows (quotations, contracts) to reduce errors and accelerate processing.
- System Optimization: Implemented RESTful APIs and optimized MySQL database queries to ensure high performance and reliable data consistency with third-party CRM services.

Feb 2025 -
Jul 2025

ZenS Company | Backend Developer

Project: WiseBuddy – AI-powered English Learning App for Vietnamese Users

Description:

- A mobile English learning app tailored for Vietnamese users, integrating an AI assistant powered by OpenAI.

Role: Backend Developer (Laravel, PHP, Filament)

Tech stack: Laravel, PHP, Filament, OpenAI GPT API, RESTful API, JWT, MySQL.

Key Responsibilities:

- Developed scalable APIs with Laravel to support learning modules, user progress, and AI conversation.
- Integrated **OpenAI GPT API** to enable real-time AI chat for vocabulary, grammar, and speaking practice.
- Built and maintained a **Filament-based** admin panel to manage lessons, vocabulary, users, and logs.
- Implemented role-based access control, user progress tracking, and usage analytics.
- Secured all APIs with JWT and optimized performance for seamless mobile use.
